

## City of Escondido – Independent Districting Commission

### 2020 Census Block Population Tables

The April 1st, 2020 Census Population of the City of Escondido was 151,516. The total citizen population that was 18 years and older, known as the citizen voting age population (CVAP) was 91,009.

The following tables contain the 2020 total population and voting age population for each of the City’s 1,021 census blocks as well as, the population for the portions of the 102 census block groups and the 38 census tracts within the City’s 2020 boundary.

These tables can be used in conjunction with the two reference maps provided by the Commission of the City’s 2020 census block groups and census blocks to determine the total population and citizen voting age population for areas within the City of Escondido.

The blue areas on the provided reference maps are the City’s 2020 census blocks and the larger red areas are the 2020 census, block groups. The light gray lines are city streets and the thick black line is the City of Escondido’s municipal boundary, as of January 2022. The census block group number is indicated on the maps by the six-digit, red number in the box while the census tract can be determined from the first five digits of the block group number such that census block groups 20202.1, 20202.2, and 20202.3 are all contained within census tract 20202.

The reference map titled, “2020 Census Block Population” details, by individual census block, the total population within the City. On this map, the 2020 total population of each census block is indicated by the small blue number within the census block. The map titled, “2020 Census Block Groups & Blocks” can be used to locate individual census blocks within their block groups. On this map, the census block number is indicated by the small blue number rather than the total block population. Both maps can be used in conjunction with the following tables to determine the population of areas within the city.
