Subject: **Phase I Environmental Site Assessment**
661 Bear Valley Parkway
Escondido, California 92025

To Whom It May Concern:

Vinje & Middleton Engineering, Inc. (VM) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of American Society for Testing and Materials Practice (ASTM) E 1527-13 and 40 Code of Federal Regulations (CFR) Part 312, of the above-referenced property. This ESA included public environmental agency and historical record reviews, interviews, site observations, and report preparation. This report includes VM's findings, conclusions, and supporting documentation.

We appreciate the opportunity to be of service to you on this project. If you should have any questions regarding this report, or if we can be of further assistance, please contact us at (760) 743-1214.

Sincerely,

Vinje & Middleton Engineering, Inc.

Ralph M. Vinje
Principal Engineer
RCE #25115

Daniel Weis
Associate Environmental Scientist

1.0 Executive Summary

1.1 Summary and Findings

At the request of the Spieth and Wohlford Inc., Vinje & Middleton Engineering, Inc. (VM) conducted a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Practice E 1527-13 and 40 Code of Federal Regulations (CFR) Part 312, of the property located at 661 Bear Valley Parkway in Escondido, San Diego County, California (hereinafter referred to as "the Site"). The 42.12-acre Site is situated to the east of Bear Valley Parkway, west of Choya Canyon Road, and north of Valley Grove Lane, and is further identified by County of San Diego Assessor's Parcel Numbers (APNs) 237-131-01-00 and -02-00.

The Site is currently developed with a single-family home and a detached garage surrounded by vacant land. The Site building was reportedly constructed in 1946. Access to the Site is provided by Bear Valley Parkway to the west. The Site is located in an area of Escondido generally comprised of residential land uses. During our Site reconnaissance, a qualified VM representative walked portions of the Site and walked accessible roadways and pedestrian walkways surrounding the Site to identify recognized environmental conditions that may affect the subject Site. No significant environmental concerns were noted during the Site reconnaissance.

Historical resources reviewed during the preparation of this Phase I ESA included aerial photographs, topographic maps, sanborn fire insurance maps, and city directories. An interview with the Site owner representative was also conducted to evaluate the historical uses of the subject Site and nearby properties. According to the interview and the historical resources reviewed, no significant environmental concerns were revealed in connection with the Site. Adjoining and nearby properties have historically been mostly vacant land dating back to the late 1970s. The surrounding area was more fully developed with the current residential structures beginning in the early 1980s.

VM reviewed standard regulatory record sources which included Federal, State and local environmental databases provided by Environmental Data Resources (EDR) for information pertaining to documented and/or suspected releases of regulated hazardous substances and/or petroleum products within specified search distances. The Site is not listed on the standard ASTM regulatory databases. The Site is referenced as Spieth and Wohlford Inc. on the non-ASTM HAZNET and San Diego Co. HMMD databases. The Site is listed on the HAZNET database for the generation of an aqueous solution with total organic residues less than 10 percent. The Site is listed on the San Diego Co. HMMD database with an inactive regulatory status. There are no spills or releases referenced for the Site. Several properties in the Site vicinity also appear on various regulatory databases, but are not considered to be significant concerns to the Site.

A summary of prior environmental assessments (Phase I and II ESA) and a soil removal action of lead impacted soil (undocumented fill material) are described in Section 4.8 of this report. No further assessment or mitigation at the Site is recommended.

1.2 Conclusions

This Phase I ESA has revealed no evidence of recognized environmental conditions in connection with the Site. Additional environmental investigation at the Site is not warranted at this time. This summary is provided for convenience and should not be substituted for review of the full report, including all attachments as provided herein.

2.0 Introduction

2.1 Purpose

The purpose of this Phase I ESA is to provide a professional opinion on the presence of recognized environmental conditions and other suspect environmental conditions in connection with the Site, as they existed on the date of the site inspection, and to recommend whether further investigation is required. ASTM Standard Practice E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, specifies minimum requirements for conducting an ESA of a parcel of commercial real estate with respect to the range of contaminants pertinent to the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as well as petroleum products. As such, this ESA is intended to satisfy one of the threshold criteria for satisfying the landowner liability protections to CERCLA liability assuming compliance with other elements of the defense. In other words, this ESA represents one of the practices that constitute "all appropriate inquiry" into the previous ownership and uses of the property consistent with good commercial or customary practice, as defined in 42 USC Section 9601(35)(B) and 40 CFR Part 312.

The goal of the process is to identify recognized environmental conditions, which are defined by the Practice as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. The term recognized environmental condition includes hazardous substances or petroleum products even under conditions in compliance with laws. In addition, the term also included historical recognized environmental conditions and controlled recognized environmental conditions. A historical recognized environmental condition is defined by the Practice as "a past release of hazardous substances or petroleum products that has occurred in connection with a property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." A controlled recognized environmental condition is defined by the Practice as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." The term recognized environmental condition is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The term "environment" is defined in CERCLA 42 USC 9601(8) as "(A) the navigable waters, the water of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Magnuson-Stevens Fishery conservation and Management Act, and (B) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States.

The term “release” means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), but excludes (A) any release which results in exposure to persons solely within a workplace, with respect to a claim which such persons may assert against the employer of such persons, (B) emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine, (C) release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.], if such release is subject to requirements with respect to financial protection established by the Nuclear Regulatory Commission under section 170 of such Act [42 U.S.C. 2210], or, for the purposes of 42 USC 9604 or any other response action, any release of source byproduct, or special nuclear material from any processing site designated under section 7912(a)(1) or 7942(a) of this title, and (D) the normal application of fertilizer.

2.2 Detailed Scope of Services

The Phase I ESA was conducted in accordance with generally accepted Phase I industry standards using ASTM Standard Practice E 1527-13, 40 CFR Part 312 and VM's Agreement by and between VM and the client. The following services were provided for this assessment:

- A search for environmental liens recorded against the Site.
- An evaluation of standard environmental record sources contained within Federal, State and local environmental databases within specific search distances.
- An evaluation of additional environmental record sources obtained from local regulatory departments/agencies including the County of San Diego Department of Environmental Health (DEH).
- A qualitative evaluation of the physical characteristics of the Site through a review of published topographic, geologic, and hydrogeologic maps; published groundwater data; and area observations to characterize surface water flow in the Site area.
- An evaluation of past Site and adjacent/nearby property uses through a review of historical resources including aerial photographs, topographic maps and city directories.
- A physical inspection of the Site (interior and exterior) conducted to search for conditions indicative of potential environmental concerns including underground storage tanks (USTs), aboveground storage tanks (ASTs), associated tank piping; stained soil or pavement, equipment that may contain or have historically contained polychlorinated biphenyls (PCBs), and other potential environmental concerns as defined in the ASTM-2013 standard.
- A physical assessment of indications of past uses and visual observations of adjacent and surrounding properties (from curbside or public spaces) to assess potential impacts to the Site.
- Interviews completed with the client, the Site owner(s) and local regulatory officials.

- The preparation of this report, which includes the findings of the assessment, our opinion (i.e., conclusions) regarding their respective levels of significance, and recommendations, as appropriate.

2.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM guidelines and the terms and conditions of the aforementioned Agreement between VM and the client. No other warranty, express or implied, is made by VM. VM's evaluations, analyses, and opinions should not be taken as representations regarding subsurface conditions or the actual value of the Site. Subsurface conditions may differ from the conditions implied by the surficial observations and the data resources reviewed, and can only be reliably evaluated through intrusive techniques.

Documentation and data provided by the client, designated representatives of the client, other interested third parties, or from the public domain, and referred to in the preparation of this assessment, are assumed to be complete and correct and have been used and referenced with the understanding that VM assumes no responsibility or liability for their accuracy. VM's conclusions are based upon such information and documentation and on our observations of Site conditions, as they existed on the date of the site inspection. Because Site conditions may change significantly over a short period of time and additional data may become available, data reported and conclusions drawn in this report are limited to current conditions and should be considered less reliable with passing time.

2.4 Limitations and Exceptions

Reasonable efforts have been made during this assessment to uncover evidence of USTs, ASTs, ancillary equipment associated with such tanks, and other subsurface structures. "Reasonable efforts" are limited to information gained from visual observation of unobstructed areas, recorded database information held in public record, and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction or debris pile storage, or incorrect information from sources.

This investigation was not an environmental compliance audit. While some observations and discussion in this report may address conditions and/or operations that may be regulated, the regulatory compliance of those conditions and/or operations is outside the scope of this investigation. Nothing in this report constitutes a legal opinion or legal advice. For information regarding specific individual or organizational liability, VM recommends consultation with independent legal counsel.

According to 40 CFR Part 312, Standards and Practices for All Appropriate Inquiry: Final Rule, CERCLA liability rests with the owner or operator of a property and not with an environmental professional hired by the prospective landowner and who is not involved with the ownership or operation of the property. This report meets the requirements set forth in 40 CFR Part 312 Standards and Practices for All Appropriate Inquiries; Final Rule. However, in order to qualify for certain landowner liability protections under CERCLA, "Bona Fide Prospective Purchasers, Contiguous Property Owners, and/or Innocent Landowners" must meet additional requirements of CERCLA (42 U.S.C. 9601 (35)(B)).

This ESA does not address non-scope ASTM considerations including asbestos containing materials, radon, lead-based paint, lead in drinking water, wetlands, protected environments and

habitat, industrial hygiene concerns, indoor air quality (unrelated to releases of hazardous substances or petroleum products into the environment) and high voltage power lines.

2.5 Special Terms and Conditions

No special terms and conditions between VM pertinent to the findings of this ESA or methodology used to complete this assessment are noted. In addition, VM does not have a financial interest in the Site.

2.6 User Reliance

This report was prepared for the sole and exclusive use of the client and its financing partners for this project and is not for the use or benefit of, nor may it be relied upon by, any other person or entity for any purpose without the advance written consent of VM and the client. VM makes no representation to any third party except that it has used the degree of care and skill ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other use or disclosure is intended or authorized by VM. In the preparation of this ESA, VM has used the degree of care and skill ordinarily exercised by a reasonably prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other warranties are made, express or implied.

3.0 Site Description

3.1 Location and Legal Description

The Site is 42.12-acres in size and consists of two legal parcels located at 661 Bear Valley Parkway in Escondido, San Diego County, California. The Site is situated to the east of Bear Valley Parkway, west of Choya Canyon Road, and north of Valley Grove Lane, and is further identified by County of San Diego APNs 237-131-01-00 and -02-00. A Vicinity Map and Topographic Map depicting the general location of the Site are included in Section 13.1.

3.2 Site and Vicinity General Characteristics

The Site is currently developed with a single-family home and a detached garage surrounded by vacant land. The Site building was reportedly constructed in 1946. The Site is located in an area of Escondido generally comprised of residential land uses. Additional details pertaining to the Site and its adjoining properties are provided in the sections below.

3.3 Current Use of the Site

The Site is currently developed with a single-family home with a detached garage surrounded by vacant land totaling 42.12 acres.

3.4 Description of Structures, Roads, Other Improvements on the Site

As stated previously, the Site is currently developed with a single-family home surrounded by vacant land. The Site can be accessed from the west by Bear Valley Parkway. Potable water and sewer services in the area are provided by the City of Escondido. Electrical and natural gas service in the area are provided by SDG&E. A Site Plan is included in Section 13.2. Photographs taken of the Site are included in Section 13.3.

3.5 Current Uses of the Adjoining Properties

The area surrounding the Site consists of public roadways and residential properties. VM performed a visual inspection of adjoining properties from adjacent sidewalks and public right-of-ways. The following table identifies the adjacent property uses:

General Direction	Adjoining Property Use
North	Intersection of Bear Valley Parkway and Choya Canyon Road, then residential properties
South	Residential properties and Valley Grove Lane
East	Choya Canyon Road and vacant land, then residential properties
West	Bear Valley Parkway, then residential properties

None of the adjoining properties were observed to be of significant environmental concern to the Site based on VM's visual inspection from public right-of-ways.

4.0 User Provided Information

4.1 Title Records

No environmentally related liens, deed restrictions or activity and use limitations pertaining to the Site were noted during research completed with the County of San Diego Tax Assessor and a review of a title report pertaining to the Site provided by the client. In addition, the client is unaware of such encumbrances recorded against the Site.

4.2 Environmental Liens or Activity and Use Limitations

The client reportedly has no knowledge of any environmental related liens or activity and use limitations (i.e. engineering or institutional controls) that are related to potential environmental issues at the Site.

4.3 Specialized Knowledge

The client is unaware of specialized knowledge pertinent to potential recognized environmental conditions at the Site.

4.4 Commonly Known or Reasonably Ascertainable Information

The client is unaware of commonly known or reasonably ascertainable information pertinent to potential recognized environmental conditions at the Site.

4.5 Valuation Reduction for Environmental Issues

As of the date of this report, the client reportedly has no information pertaining to the estimated fair market value of the property that might indicate that significant contamination exists.

4.6 Owner, Property Manager, and Occupant Information

The Site is currently vested in the Spieth and Wohlford Inc. This entity is also considered the Site manager. The Site is currently developed with a single-family home surrounded by vacant land.

4.7 Reason for Performing Phase I ESA

VM, as an independent consultancy, has been retained to conduct this Phase I ESA to identify environmental issues that may be present and to comply with 40 CFR Part 312.

4.8 Other

The client provided AEC with multiple environmental reports pertaining to the Site which is summarized below.

Phase I Environmental Site Assessment, 661 Bear Valley Parkway, Escondido, California, Assessor's Parcel Numbers 237-131-01 & -02, prepared by Vinje & Middleton Engineering, dated February 14, 2013.

Due to the historical use of the property for agricultural purposes, a Phase II ESA was recommended.

Limited Phase II Environmental Site Assessment, 661 Bear Valley Parkway, Escondido, California, Assessor's Parcel Numbers 237-131-01 & -02, prepared by Vinje & Middleton Engineering, dated May 24, 2013.

Due to the Site's historical uses as a potential mine near the turn of the 20th century and as a citrus and avocado grove between the years 1947 and 1998, a limited Phase II Site Assessment was conducted by VM. Soil sampling and analysis was conducted during the Phase II ESA of the overall 42 acre Site (28 sample locations). Organochlorine pesticides (OCPs) were the primary target analytes of potential concern and were not detected at or above the analytical laboratory reporting limits. In addition, what were considered to be minor concentrations of the metals arsenic and/or mercury were detected in three soil samples. In addition, minor concentrations of petroleum hydrocarbons were detected in two soil samples. The concentrations of such constituents were below actionable levels relative to a proposed residential land use. As such, no additional assessment was recommended. In addition, no mitigation of Site soils was recommended.

Report of Soil Removal Action, 661 Bear Valley Road, Escondido, California, prepared by Vinje & Middleton Engineering, dated July 21, 2015.

As a result of a project approval related comment from the City of Escondido regarding apparent undocumented fill soils along the northeastern edge of the Site, VM collected soil samples from this area. A summary of the work completed is as follows:

- On April 9, 2015, an initial two soil borings were advanced using a hand auger (identified as B1 and B2) to a depth of eighteen inches below existing grades in an area of debris laden fill material at the Site. VM field personnel placed the soil samples in to analytical laboratory provided four ounce glass jars. Soil samples were then placed on ice at the time of collection and during delivery to the analytical laboratory. The samples were analyzed for total petroleum hydrocarbons (TPH) in the gasoline, diesel and oil ranges by United States Environmental Agency (EPA) test Method 8015B by Baseline On-Site Analysis, a State-certified environmental laboratory located in Huntington Beach, California. The samples were also analyzed for OCPs by United States EPA test Method 8081A, Title 22 Metals by United States EPA test methods 6010B/7000CAM, and SVOCs by United States EPA test method 8270C by American Environmental Testing Laboratory Inc., a State-certified environmental laboratory located in Burbank, California.
- On May 7, 2015, an additional fifteen soil borings (identified as B3 through B17) were advanced by hand auger to depths of eighteen inches below existing grades and sampled. The fifteen soil samples were analyzed for total lead by United States EPA test method 6010B.
- Based on the results of the sampling events described above, an area of lead impacted soil was delineated (approximately 15-feet long x 5-feet wide) and removed from the face of the slope of fill material on June 12, 2015. The material was then stockpiled on-Site pending waste characterization. Upon removal, four confirmation soil samples identified

as B18 through B21 were obtained from the soil removal action area and analyzed for total lead. Four stockpile soil samples identified as S1 through S4 were obtained and analyzed for total lead, soluble lead, TPH and/or Title 22 Metals.

- The stockpiled material was covered with plastic sheeting pending removal from the Site. A total of 15.73 tons (approximately 10 cubic yards) of lead impacted soil was transported to Philadelphia Recycling Mine in Mira Loma, California on July 6, 2015 for disposal as a non-hazardous waste.

Conclusions and recommendations of the report were as follows:

- The soil sampling and analysis completed at the Site allowed VM to delineate an area of impacted soil containing lead that was subsequently removed from the Site.
- A total of 15.73 tons (approximately 10 cubic yards) of lead impacted soil was transported to Philadelphia Recycling Mine in Mira Loma, California on July 6, 2015 for disposal as a non-hazardous waste.
- Confirmation soil samples revealed total lead concentrations below the residential screening level.
- No other contaminants of concern were identified at the Site.
- No further assessment or soil removal actions at the Site are considered to be warranted.

5.0 Records Review

5.1 Standard Environmental Record Sources

VM reviewed Federal and State environmental databases provided by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut for information pertaining to documented and/or suspected releases of regulated hazardous substances and/or petroleum products within specified search distances. A copy of the EDR report is included in Section 13.4.

VM also reviewed unmappable sites listed in the environmental database report by cross-referencing addresses and site names. Unmappable sites are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be mapped because of inaccurate or missing location information in the record provided by the regulatory agency. Any unmappable sites that VM identifies within the specified search radii were evaluated as part of the preparation of this report.

The following Federal databases related to potential on-site and off-site sources of contamination were reviewed and interpreted by VM:

Federal Databases	Search Distance From Site
National Priorities List (NPL)	One mile
Delisted NPL	One mile
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)	One-half mile
CERCLIS No Further Remedial Action Planned (NFRAP)	One-half mile
Resource Conservation and Recovery Act (RCRA) CORRACTS Hazardous Waste Treatment, Storage and Disposal (TSD) Facilities	One mile
Resource Conservation and Recovery Act (RCRA) NON-CORRACTS Hazardous Waste TSD Facilities	One-half mile
RCRA Hazardous Waste Generators (RCRA GEN)	One-eighth mile
Emergency Response Notification System (ERNS)	One-eighth mile
Facility Index Systems (FINDS)	One-eighth mile
Federal Institutional/Engineering Control Registries (IC/EC)	One-half mile

The following State/local databases related to potential on-site and off-site sources of contamination were also searched and reviewed:

State/Local Databases	Search Distance From Site
State Equivalent NPL and CERCLIS (RESPONSE and Envirostor)	One mile
State Voluntary Cleanup Sites (VCP)	One-half mile
State/Local Brownfield Sites and Institutional/Engineering Control Registries	One-half mile
Inactive, Active, and/or Permitted Solid Waste/Landfill Facilities (SWL)	One-half mile
Leaking Underground Storage Tanks (LUST)	One-half mile
Spills, Leaks, Investigations and cleanup (SLIC)	One-half mile
Registered Underground and Aboveground Storage Tanks (UST/AST)	One-eighth mile
San Diego County DEH Site Assessment and Mitigation (SAM)	One-half mile

Descriptions/sources of each of the above referenced regulatory databases and the dates these databases were last updated by the applicable regulatory agencies are included in the EDR report.

Subject Site

The Site is not listed on any of the standard databases searched by EDR.

Adjoining and Nearby Properties

One listing was identified in the standard regulatory databases mapped within a one-mile of the subject Site. The following table presents a summary of the listed property and an opinion regarding the potential impact to the Site.

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
Brotherton Plaza 2250 S Escondido Boulevard	ENVIROSTOR	0.721-mile WSW	Referenced with a "Refer: 1248 Local Agency" status as of March 2001.	No

As shown in the table above, the property mapped within a one-mile radius of the Site is not considered to be of significant environmental concern to the Site. This opinion is based on several factors including the nature of the regulatory database listing, distance of the off-Site listed property from the Site, orientation of the listed property relative to the Site, interpreted direction of groundwater flow, and/or regulatory case status information for the property as described in the database.

Non-ASTM Database Reviews

Below is a list of non-ASTM databases searched by EDR and reviewed by VM during the preparation of this assessment. The descriptions of each database and their data release frequency are included in the EDR report, included in Section 13.4.

US MINES – Mines Master Index File
PEST LIC – Pesticide Regulation Licenses Listing
WASTEWATER PITS – Oil Wastewater Pits Listing
ECHO – Enforcement and Compliance History Information
FUELS PROGRAM – EPA Fuels Program Registered Listing

The Site is referenced as Spieth and Wohlford Inc. on the non-ASTM HAZNET and San Diego Co. HMMD databases. The Site is listed on the HAZNET database for the generation of an aqueous solution with total organic residues less than 10 percent. The Site is listed on the San Diego Co. HMMD database with an inactive regulatory status. There are no spills or releases referenced for the Site.

One off-Site property mapped within one-eighth mile of the Site is listed on the CHMIRS non-ASTM regulatory databases searched by EDR. This non-ASTM database listing is not expected to have adversely impacted the Site. This opinion is based on several factors including the nature of the regulatory database listing, distance of the off-Site listed property from the Site, orientation of the listed property relative to the Site, interpreted direction of groundwater flow and/or regulatory case status information for the property as described in the database.

5.2 Additional Environmental Record Sources

State Water Resources Control Board (SWRCB)

VM searched the California State Water Resources Control Board (SWRCB) maintained Geotracker database for information regarding past or present environmental regulatory cases and/or hazardous material releases in connection with the Site or its adjacent and nearby properties. No environmental regulatory or release cases for the Site were identified in the Geotracker database search. Information included in the SWRCB Geotracker database regarding

the nearby properties is consistent with the information found in the EDR regulatory database report.

San Diego County Department of Environmental Health (DEH)

San Diego County DEH records were searched for the Site. Records pertaining to the Site were not found in DEH files. No other records searches with local or State regulatory agencies were deemed warranted.

5.3 Physical Setting Sources

The following physical setting sources were reviewed to provide information about the topographic, hydrologic, geologic and/or hydrogeologic characteristics of the Site.

5.3.1 Topography and Hydrology

USGS Topographic Quadrangle

The Site is depicted on the 2015 USGS topographic map for the Escondido, California 7.5 minute quadrangle, which ranges in elevation of approximately 570 to 650 feet above mean sea level. No features of environmental concern are noted on the map.

Hydrology/Storm Water Management

The Site slopes to the southwest towards an unnamed creek. The Site does not appear to receive significant drainage from off-Site properties.

5.3.2 Geology

The Site lies within the coastal section of the Peninsular Ranges Geomorphic Province; one of 11 physiographic provinces in California recognized by defining features based on geology, faults, topography, and climate. The Peninsular Ranges Province is dominated by a series of northwest-oriented mountain ranges extending from the Baja California peninsula in the south to the Transverse Ranges in the north. The series of mountain ranges are separated by northwest trending valleys, subparallel to faults branching from the San Andreas Fault System. Igneous, metamorphic, and sedimentary rocks are all found within the Peninsular Ranges Province. Plutonic (igneous) rocks of the Peninsular Ranges batholith are predominant throughout much of the Province. The batholithic rocks were emplaced during Cretaceous-age orogenic events, and uplifted into the present mountain ranges during the late Tertiary and Quaternary. The coastal section of the Province is underlain by a thick sequence of marine- and terrestrial-derived sedimentary rock units that unconformably overlie basement rocks. Nearly flat marine terraces lie at different elevations throughout the coastal section of the Province as a result of sea floor erosion during marine standstills and subsequent Quaternary faulting and uplift. According to geologic map sources, the Site is underlain at depth by old paralic deposits that is mostly poorly sorted, moderately permeable, reddish-brown, interfingering strandline, beach, estuarine and colluvial deposits composed of siltstone, sandstone and conglomerate (CGS 2010). The Site, as is all of Southern California, is an active seismic area. However, no faults appear to be mapped across the Site.

5.3.3 Hydrogeology

The Site is situated within the Hodges Hydrologic Area of the San Dieguito Hydrologic Unit. Groundwater in the Hodges Hydrologic Area has existing beneficial use designations for municipal, agricultural, and industrial supply purposes. Static groundwater beneath the Site is likely present at a depth of greater than 20 feet below the ground surface with an estimated flow direction toward the southwest.

5.4 Historical Use Information on the Subject Site

VM reviewed several historical sources (as described in the following sections) to develop a history of the previous uses of the Site, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Site. Copies of historical resources are included in Section 13.5.

Aerial Photographs

VM reviewed historical aerial photographs from the years 1947, 1953, 1964, 1968, 1980, 1989, 1995, 2002, 2009 and 2012 via online resources. In the aerial photographs from 1947 through 1989, the Site appears to be developed as a citrus and avocado grove and with the single-family home. In the photographs from 1995 through 2012, the Site appears to be in its current configuration as a residence and vacant land.

Topographic Maps

VM reviewed historical topographic maps from the years 1893, 1897, 1901, 1906, 1921, 1929, 1937, 1946, 1949, 1958, 1963, 1970, 1971, 1988 and 2001 via online resources. The Site is depicted with a structure on the northern portion on the topographic maps from 1949 through 2001.

Historic Fire Insurance Maps

VM requested Sanborn maps from EDR for the Site. EDR indicated that the area is unmapped and Sanborn map coverage is not available for the Site.

City Directories

VM reviewed city directories from 1971 to 2006 provided by EDR. The Site is listed as residential properties (i.e. personal names) in all of the directories.

5.4.1 State of California Division of Oil and Gas Records

According to online resources provided by the California Department of Conservation, Division of Oil, Gas and Geothermal Resources, there are no oil, gas or geothermal wells located on the Site.

5.5 Historical Use Information on Adjoining Properties

VM also reviewed several historical sources (as described in the following sections) to develop a history of the previous uses of adjoining properties and the surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Site.

Aerial Photographs

As stated previously, VM reviewed historical aerial photographs from the years 1947, 1953, 1964, 1968, 1980, 1989, 1995, 2002, 2009 and 2012 via online resources. In the aerial photographs from 1947 to 1968, the surrounding area is comprised of mostly citrus and avocado groves. Residential properties begin to develop in the 1980 aerial photograph. Bear Valley Parkway is shown in its current configuration in the 1980 aerial photograph. The adjacent properties appear in their current configurations in the 2002 through the 2012 aerial photographs.

Topographic Maps

VM reviewed historical topographic maps from the years 1893, 1897, 1901, 1906, 1921, 1929, 1937, 1946, 1949, 1958, 1963, 1970, 1971, 1988 and 2001 via online resources. The surrounding area is depicted as vacant and undeveloped on the maps reviewed from 1893 to 1963. The surrounding area is depicted with scattered structures on the maps reviewed from 1970 to 2001. Bear Valley Parkway is in its current configuration on the maps reviewed from 1978 to 2001. The surrounding area is shaded red (indicating urban development) on the map reviewed from 2000.

Historic Fire Insurance Maps

VM requested Sanborn maps from EDR for the Site. EDR indicated that the area was unmapped and did not have Sanborn map coverage.

City Directories

VM reviewed city directories from 1971 to 2013 provided by EDR. The adjoining properties are listed as residential properties in all directories reviewed.

5.5.1 State of California Division of Oil and Gas Records

According to online resources provided by the California Department of Conservation, Division of Oil, Gas and Geothermal Resources, there are no oil, gas or geothermal wells located on adjoining properties of the Site.

6.0 Site Reconnaissance

The objective of the Site reconnaissance was to obtain information indicating the likelihood of recognized environmental conditions in connection with the Site. The reconnaissance was conducted on April 15, 2016 by VM. VM was unaccompanied during the Site reconnaissance.

6.1 Methodology and Limiting Conditions

The Site reconnaissance consisted of inspecting the Site and walking accessible roads surrounding the Site. VM was not granted access into the single-family home and the detached garage. The lack of access to such structures does not alter VM's conclusions and recommendations regarding the Site. As stated previously, a Site Plan is included in Section 13.2. Photographs of the Site were taken to document existing Site conditions and several are included and described in Section 13.3.

6.2 General Site Setting

As stated previously, the Site is currently developed with a single-family home and a detached garage surrounded by vacant land. The Site is located in an area of Escondido generally comprised of residential land uses.

6.3 Site Observations

VM examined accessible areas of the Site for evidence of the following potential environmental concerns:

Conditions	Not Observed or Noted	Observed or Noted	Significant Concern?
Hazardous Substances/Petroleum Products	X		--
Waste Generation/Storage/Disposal	X		--
ASTs		X	No
USTs	X		--
PCB Containing Equipment		X	No
Chemical/Petroleum Odors	X		--
Pools of Liquid	X		--
Floor Drains/Sumps/Wells	X		--
Drums	X		--
Stains or Corrosion	X		--
Unidentified Substance Containers	X		--
Stained Soil or Pavement	X		--
Stressed Vegetation	X		--
Pits, Ponds or Lagoons	X		--
Wastewater Discharges/Disposal Systems	X		--
Septic Systems/Cesspools		X	No
Non-Hazardous Solid Waste Disposal Areas	X		--
Drinking Water Systems/Water Wells/Other Wells	X		--

The noted items in the table above are discussed below.

ASTs

A 250-gallon propane AST was observed adjacent to the on-Site residence. The AST appeared to be in fair condition with no evidence of a release.

PCB Containing Equipment

A pole mounted electrical transformer was noted on the northern portion area adjacent to the driveway. The transformer is utility owned (SDG&E) and is not labeled with respect to PCB content. There were no indications of releases from the transformer.

Septic Systems/Cesspools

The on-Site residence is likely serviced by a septic system.

7.0 Interview Information

7.1 Interview With Owner

As stated previously, the Site is currently vested in Spieth and Wohlford Inc. The Site owner is unaware of significant environmental concerns in connection with the Site.

7.2 Interview With Site Manager

The Site owner is also considered to be the Site Manager. Please refer to Section 7.1 above.

7.3 Interviews With Occupants

No interviews with occupants were conducted as a part of this assessment. The lack of an interview with Site occupants does not alter AEC's conclusions and recommendations regarding the Site.

7.4 Interview With Local Government Official

During the preparation of this assessment, multiple governmental agency representatives were interviewed regarding the availability of public records pertaining to the Site.

7.5 Interview With Others

No other interviews were conducted as a part of this assessment.

8.0 Findings, Opinion and Conclusions

VM has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Practice E 1527-13 and 40 CFR Part 312 of the property located at 661 Bear Valley Parkway in Escondido, California (County of San Diego APNs 237-131-01-00 and -02-00). Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the Site. Additional environmental investigation at the Site is not considered to be warranted at this time.

9.0 Deviations and Data Gaps

No deviations or significant data gaps as defined in the ASTM-2013 standard were noted during the preparation of this assessment.

10.0 Additional Services

No additional services were completed by VM during the preparation of this assessment.

12.0 Signatures and Qualifications of Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/01/2016 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

DETAIL MAP - 4592434.1S

-  Target Property
-  Sites at elevations higher than or equal to the target property
-  Sites at elevations lower than the target property
-  Sensitive Receptors
-  National Priority List Sites
-  Dept. Defense Sites

-  Indian Reservations BIA
-  Power transmission lines
-  Pipelines
-  100-year flood zone
-  500-year flood zone
-  National Wetland Inventory
-  State Wetlands

-  Areas of Concern

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/30/2015	Source: EPA
Date Data Arrived at EDR: 11/07/2015	Telephone: N/A
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/30/2015	Source: EPA
Date Data Arrived at EDR: 11/07/2015	Telephone: N/A
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 58	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 04/08/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 07/18/2016
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/11/2016	Source: EPA
Date Data Arrived at EDR: 01/22/2016	Telephone: 800-424-9346
Date Made Active in Reports: 03/18/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 56	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/11/2016	Source: EPA
Date Data Arrived at EDR: 01/22/2016	Telephone: 800-424-9346

Number of Days to Update: 56	Next Scheduled EDR Contact: 06/06/2016
	Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/09/2015	Source: EPA
Date Data Arrived at EDR: 03/02/2016	Telephone: 800-424-9346
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016
	Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Certified Sanborn® Map Report

04/14/16

Site Name:

Bear Valley
661 Bear Valley Parkway
Escondido, CA 92025
EDR Inquiry # 4592434.2

Client Name:

Advantage Env. Consultants LLC
145 Vallecitos De Oro
San Marcos, CA 92069
Contact: Natalie Norberg

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Advantage Env. Consultants LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # B63C-41B4-9D09

PO # NA

Project 16-109SD

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: B63C-41B4-9D09

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.
