FIRST PHASE OF BEAR VALLEY PARKWAY REALIGNMENT COMPLETED

The first phase for the new alignment of Bear Valley Parkway has been completed and will be opened to two-way traffic on Thursday, May 21. In addition, traffic signals at the new intersection with Valley Parkway will also become operative that day.

The realignment of Bear Valley Parkway is being done in three stages. The second phase will involve utility construction along the old alignment of Bear Valley Parkway, as well as the modification of portions of the former roadway and intersecting streets to connect to the new roadway alignment and elevation. Also to be completed is the easterly half of the new Bear Valley Parkway alignment leading to Valley Parkway, together with widening the south side of Valley Parkway with full improvements up to Falconer Road. This work is anticipated to take approximately eight (8) months.

The third and final phase of construction will complete roadway improvements along the southeasterly side of Valley Parkway, from Falconer Road to the new El Norte Parkway intersection. Barring unforeseen circumstances, it is anticipated this work will be completed by August 2010.
