### **CLIMATE ACTION PLAN UPDATE – PHG 18-0009:**

**REQUEST:** The Climate Action Plan Update ("CAP Update") consists of a comprehensive update to the 2013 CAP. The CAP update serves as a roadmap for the City to reduce citywide greenhouse gas emissions ("GHG emissions") and builds on the 2013 CAP by updating the GHG emissions inventory with a new baseline year and forecasting emissions, consistent with state legislation and executive orders that are aimed at reducing Statewide GHG emissions. This includes AB 32, which established a target of reducing Statewide GHG levels to 1990 levels by 2020; SB 32, which established a mid-term target of reducing Statewide GHG levels to 40 percent below 1990 levels by 2030; and Executive Order S-3-05, which recommends a longer-term statewide GHG reduction goal of reducing emissions to 80 percent below 1990 levels by 2050. By establishing consistency with state legislation, the CAP Update seeks to streamline future development approvals within the City. The City has also developed a Climate Action Plan Consistency Review Checklist, in conjunction with the CAP Update, to provide a streamlined review process for proposed new development projects that are subject to discretionary review and trigger environmental review pursuant to CEQA. The CAP Update also provides a range of adaptation strategies and measures as an additional component to climate action planning. The City recognizes the importance of building resilience in the community to future climate change—related impacts through climate adaptation. Through "adaptation planning" the City is undertaking a process of identifying climate risks and opportunities, assessing the options to manage these risks and opportunities, and implementing actions to sustain and even improve the community's quality of life. The Planning Commission will be asked to review and consider the project and provide a recommendation to the City Council. The proposal also includes the adoption of the environmental determination prepared for the project.

**PROPERTY SIZE AND LOCATION:** Citywide

**ENVIRONMENTAL STATUS:** A Draft Initial Study/Mitigated Negative Declaration ("IS/MND") was issued for a 30-day public review, beginning on July 1, 2020, and ending July 31, 2020, in conformance with the California Environmental Quality Act ("CEQA"). The IS/MND incorporates mitigation measures that will avoid or mitigate impacts related to cultural/tribal cultural resources to a less than significant level.

If you challenge this item in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing.
