Estimated amount of disturbed acreage______ acres

If equal to or greater than one (1) acre, you must also provide a WDID number from the SWRCB:

Are there any watercourses or waterbodies within 200 feet of the limits of soil disturbance? YES_______ NO________

SECTION 2. Best Management Practices

Best Management Practices

The goal of storm water management planning is to reduce pollution to the maximum extent practicable by implementing Best Management Practices (BMPs). The following are minimum BMPs that should be implemented:

1) Erosion control practices
2) Velocity reduction
3) Sediment control practices
4) Offsite sediment tracking control
5) General site and materials management

BMPs from each of the five categories must be used together as a system in order to prevent erosion, sediment, wastes, spills, and residues from leaving the site. When properly implemented, monitored and maintained, BMPs will function to prevent pollutants (including sediment) from leaving the site. It is the responsibility of the property owner and the contractor to implement all necessary BMP’s to comply with the Erosion Control Plan, the City of Escondido's Municipal Code, and any State requirements.

SECTION 3. Certification

The following certification must be signed before a Construction Permit will be issued.

I have read and understand that the City of Escondido has been required to adopt minimum requirements for storm water management of construction activities. I certify that I shall implement the BMPs required to effectively minimize the potentially negative impacts of this project's construction activities on water quality. I further agree to install, monitor, maintain or revise the selected BMPs to ensure their effectiveness.

I agree to indemnify, defend and hold harmless the City and its officers, employees and agents from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, administrative proceedings, damages, fines, penalties, judgments, orders, liens, levies, costs and expenses of whatever nature, including reasonable attorneys' fees and disbursements, arising out of any violation, or claim of violation of the San Diego Municipal Storm Water Permit (Order No. 20013-0001 and NPDES No. CAS0109266), and updates, of the California Regional Water Quality Control Board Region 9, San Diego, which the City might suffer, incur, or become the subject by reason of or occurring as a result of or allegedly caused by the activities subject to this Plan.
I also understand that non-compliance with the City's Grading and Erosion Control Ordinance may result in enforcement by the City, including fines, cease and desist orders or other actions.
